

1. Заходим в github под своим аккаунтом
2. Переходим в репозиторий по второму заданию https://github.com/smartigaorg/geometric_lib
3. Нажимаем кнопку **Fork** и в открывшемся окошке кнопку **Create a new fork**

В форме создания Fork-а убираем чек-бокс ***Copy the main branch only.***
Нажимаем ***Create Fork.***

The screenshot shows the GitHub interface for creating a new fork of the repository `smartqaorg/geometric_lib`. The browser tabs at the top include 'Verif...', '[GitHub]', 'SSH', 'mem...', 'SSH', and 'Fork'. The address bar shows the URL `github.com/smartqaorg/geometric_lib/fork`. The repository navigation bar includes links for 'Code', 'Issues' (34), 'Pull requests' (1.2k), 'Actions', 'Projects', 'Security and quality', and 'Insights'. The main heading is 'Create a new fork', followed by an explanatory paragraph and a link to 'View existing forks'. A note states 'Required fields are marked with an asterisk (*)'. The 'Owner' field is set to 'learndos37' and the 'Repository name' field is 'geometric_lib', with a green confirmation message 'geometric_lib is available.' below. A paragraph explains the default naming convention. The 'Description' field is empty with a character count of '0 / 350 characters'. The checkbox 'Copy the main branch only' is unchecked, with a link to 'Learn more.' below it. An information icon and text state 'You are creating a fork in your personal account.' At the bottom right is a green 'Create fork' button.

Owner * Repository name *

learndos37 / geometric_lib

geometric_lib is available.

By default, forks are named the same as their upstream repository. You can customize the name to distinguish it further.

Description

0 / 350 characters

☐ Copy the main branch only
Contribute back to smartqaorg/geometric_lib by adding your own branch. [Learn more.](#)

i You are creating a fork in your personal account.

Create fork

Откроется страничка Fork-нутого репозитория в вашем аккаунте.
Нажимаем кнопку **Main** и видим что все ветки тоже скопированы.
